

Open the burpsuite and turn on the intercept in the proxy. Click a different product type and send that request to the repeater. In the category's value try the 'order by 1-- command or ' union select null-- command by changing the numeric value in order or number of null values in union select command until you get an error. With the help of the command 'union+select+null,+null,+null,+null-- you can complete this lab and this means there are 3 columns returned.
